SUMMARY

Self-taught junior developer with hands-on experience in Python, Git, and building real-world projects. Strong problem-solving ability, consistent learning habits, and a proven track record of working effectively in team environments. Seeking an entry-level software engineering role where I can contribute to meaningful projects and continue developing my technical skills.

SKILLS

- **Languages:** Python, GDScript, C (learning) C# (learning), Markdown
- **Tools:** Git, GitHub, VS Code, PowerShell
- **Technologies:** REST APIs, JSON, CLI tools, Godot Engine
- **Other:** Debugging, version control, clean code practices, automation mindset

PROJECTS

Spotify Mood-Mixer — Python, Webbrowser, CLI

A Python program that determines a user's mood through a short survey and launches a matching Spotify playlist.

- Built a mood-scoring system using dictionaries and conditional logic.
- Integrated Python's `webbrowser` module to open curated Spotify playlists.
- Designed a clean CLI flow with input validation and user-friendly prompts.

AI RudeBot — Python, Tkinter, FastAPI, Groq API

A desktop chatbot with a humorous "rude" personality, featuring a custom backend and GUI.

- Developed a FastAPI backend hosted on Render using Pydantic models for request/response validation.
- Implemented chatbot communication using Python's `requests` library and Groq's API.
- Built a Tkinter-based GUI with message history, input handling, and asynchronous API calls.
- Structured the project with clear separation between UI, API logic, and personality system-prompting.

Notes CLI Tool — Python, File I/O, Automation

A command-line tool that appends quick notes to a local text file for fast personal organization.

- Built using Python with file read/write operations and input handling.
- Designed a simple, efficient workflow for adding notes directly from the terminal.
- Demonstrates automation mindset and practical tool-building for real daily use.

WORK EXPERIENCE

Route Sales — Frito-Lay | Jan 2020 – Present

- Manage and grow product presence across multiple high-volume retail accounts.
- Build and maintain strong working relationships with store management teams.
- Ensure accurate inventory levels and high-quality merchandising standards.
- Independently plan daily routes, prioritize tasks, and solve logistical challenges.

Line Quality Controller — Owens-Illinois Glass Plant | Feb 2018 – Jan 2020

- Performed structural and visual quality inspections on high-speed production lines.
- Collaborated with forming teams to identify defects and maintain production standards.
- Documented quality issues and communicated findings to supervisors and engineers.

Independent Contractor — River City Rush Delivery | Feb 2015 – Oct 2018

- Owned and operated a 26' box truck for business-to-business deliveries.
- Delivered to high-security clients including Intel and Portland International Airport.
- Managed all business operations including scheduling, finances, and vehicle maintenance.
- Demonstrated reliability, time management, and strong customer communication.

EDUCATION

CS50P: Introduction to Programming with Python — Harvard (Completed)

CS50x: Computer Science — Harvard (In Progress)

CS50W: Web Development — Harvard (Planned)

CS50AI: Artificial Intelligence — Harvard (Planned)

High School Diploma — Gresham High School

ADDITIONAL

- GitHub portfolio with active projects
- Fast learner with strong self-teaching habits
- Excellent communication and teamwork skills
